I'm a mobile developer specializing in **Flutter**. [Winner](#) of the [Global Gamers Challenge](#) by Flutter among 3500+ participants, for which the prize includes a fully sponsored trip to the **Google NYC office** to meet the official **Flutter team**.

I also have experience with **Firebase** which I have used extensively to build functional mobile apps. Capable of translating design ideas into code.

## Experience

Jul 2021 - PRESENT

[Zeeve](#) - *Software Engineer - Flutter*

### PRODUCT APP

- Led the integration for appchains and rollups in the [Zeeve Mobile App](#) ([Android](#) | [iOS](#)) boosting store listing acquisitions by **46%**.
- This includes the integration of zkSync Hyperchains, Polygon CDK, Avalanche Subnet, and Parachains. Additionally, I've implemented support for permissive chains such as Hyperledger Besu and Fabric.
- This led to the onboarding of more enterprise clients, boosting the company's revenue by **33%** in the quarter.

### WEB3 WALLET APPS

- Led a team of 5 for the development and deployment (from scratch) of mobile wallet applications for blockchain protocols like [Phaeton](#) ([Android](#) | [iOS](#)) and [DComm](#), utilising the Flutter framework.
- Engineered mobile wallets to allow users to create wallets, store and transfer assets and tokens, stake tokens for rewards & send NFTs and tokens. This boosted the user installs by **102%**.

### BLOCKCHAIN EXPLORER

- Contributed to the development of the [Tracehawk](#) blockchain explorer (WIP). Utilized a range of technologies including Next.js, Tailwind CSS, and Typescript to enhance its functionality and user experience.

## Projects

### [EcoShift Chronicles](#)

- [EcoShift Chronicles](#) is the winner of the [Global Gamers Challenge](#) organised officially by Flutter. The game places the power of choice in your hands, reshaping the world based on your decisions. This is the only **Indian** project among the top 10 finalists.

### [Portfolio Project](#)

- Highlights the projects I've contributed to, featuring sleek designs and captivating animations, crafted with Flutter.

### Parallax Cards [Package]

- Parallax Cards is an open-source flutter package to achieve the realistic scrolling parallax effect on background images with customizable options for card overlays.

### Novela

- Developed and deployed a flutter application which portrays chat conversations in a fun story-like way.
- Implemented Google and Facebook auth, Firebase realtime database, Google ads and Paytm payment gateway. The app has 1k+ installs.

## Skills

**PROGRAMMING:** Flutter, Dart, Java, Android, JavaScript, TypeScript, React, NextJs, JSON, Data Structures and Algorithms

**CLOUD AND BACKEND:** Firebase, AWS, GCP, DBMS, Node.js, REST API

**IDE:** VS Code, Android Studio

**VERSION CONTROL:** GitHub, GitLab

**COLLABORATION:** Confluence, Jira, Postman

**OS:** Windows, MacOS, Linux

## Education

2018 - 2021

**DELHI UNIVERSITY** - *BSc (Hons) Computer Science*  
*Ramanujan College*

**8.541 CGPA**

2015 - 2018

**DELHI KANNADA SR SEC SCHOOL** - *Higher Secondary Education*

**XII (PCM)** - 92.6%

**X - 10 CGPA**

## Achievements

- [Winner](#) of the [Global Gamers Challenge](#) by Flutter
- Winner at IGDТУW'19 Inerve Hackathon
