OS: Windows, MacOS, Linux

ACHIEVEMENTS

Top 20 at Global Gamers Challenge by Flutter

Winner at IGDTUW'19 Innerve Hackathon

EXPERIENCE

Software Engineer
Zeeve
(Jul 2021 - Present)

PRODUCT APP
- Worked on the Zeeve Mobile App (Android | iOS) for integrating support for appchains and rollups.
- This includes the integration of zkSync Hyperchains, Polygon CDK, Avalanche Subnet, and Parachains. Additionally, I've implemented support for permissive chains such as Hyperledger Besu and Fabric.

WEB3 WALLET APPS
- Led the development and deployment of mobile wallet applications for blockchain protocols like Phaeton (Android | iOS) and DComm, utilising the Flutter framework.
- Developed mobile wallets to allow users to create wallet, store and transfer assets and tokens, stake tokens for rewards & send NFTs and tokens.

PROJECTS

EcoShift Chronicles

- EcoShift Chronicles is one of the top 20 projects of the Global Gamers Challenge organised officially by Flutter. The game places the power of choice in your hands, reshaping the world based on your decisions.

Portfolio Project

- Highlights the projects I've contributed to, featuring sleek designs and captivating animations, all developed with Flutter.

Parallax Cards [Package]

- Parallax Cards is an open-source flutter package to achieve the realistic scrolling parallax effect on background images with customizable options for card overlays.

Novela

- Developed and deployed a flutter application which portrays chat conversations in a fun story-like way.
- Implemented Google and Facebook auth, Firebase realtime database, Google ads and Paytm payment gateway.
