EXPERIENCE

Software Engineer

Zeeve

(Jul 2021 - Present)

- Developed and deployed mobile wallet applications for blockchain protocols, including Phaeton and DComm, utilizing the Flutter framework.
- Collaborated cross-team to create mobile applications for blockchain protocols, showcasing effective teamwork and communication skills.
- Successfully implemented WalletConnect functionality, enabling seamless connectivity with dApps for blockchain protocols such as the Phaeton network.

PROJECTS

Phaeton Wallet (Android & iOS) — Official wallet for the Phaeton blockchain

- Led the development and deployment of mobile wallet for the Phaeton Blockchain, empowering seamless storage and secure transfer of PHAE between accounts.
- Integrated cryptographic functionalities into the Phaeton Wallet, including blake3 hashing and AES256 encryption.
- Implemented the WalletConnect protocol to establish a secure and seamless data transfer mechanism between the wallet and decentralized applications (dApps).

DComm Wallet (Android & iOS) — Official wallet for the DComm blockchain

- Developed the DComm Wallet, an intuitive and highly secure non-custodial wallet tailored for storing DComm assets.
- Delivered the DComm Wallet with comprehensive features, including NFT minting and transfer, cross-chain transfers, subnet integration, staking mechanisms, and theme customization.

Novela — A chat stories app built using Flutter

Developed and deployed a flutter application which portrays chat conversations in a fun story-like way.

- Implement features like Google and Facebook auth, integrated with Google ads and a payment gateway.
- Backend built using the realtime database of Firebase.
- The app has 1000+ downloads at the Google Play Store.
